RE: Utility Upgrade for Parcel ID 8317-01-100-005, Marshalltown, IA 50158:

Dear Marshall County:

ProSource Technologies, LLC has been hired by Interstate Power and Light Company (Alliant Energy) to work with property owners in obtaining a new utility power easement.

Interstate Power and Light (Alliant Energy) is upgrading their electrical system in your area. Replacing overhead lines, transformers, switches, upgrading to an underground system are some of the items that could change along your property. This means that are cases we need to acquire new easements because of the transition of an overhead electrical supply system to an underground electrical supply system. Please note part of the power system will remain overhead, yet many areas will be converted to underground systems.

I have enclosed a copy of the utility power easement that we are requesting from your property. If you do not have any questions you can sign and have document notarized and return it in the SASE provided. The second copy of the easement is for your records. This utility easement is regarding the following property – Parcel ID 8317-01-100-005, Marshalltown, IA 50158.

If you have questions or comments feel free to call me at 319-893-3008 (Cell) or email at jhill@prosourceland.com. I would be more than happy to come out to your property and explain in person the details of this project and how it will affect your property. In addition, I am an Iowa Notary and can provide that service to you at no cost at your residence. If you have further questions call 1-800-ALLIANT (1-800-255-4268) and ask for Rick Kullander or the Real Estate department.

Sincerely,
ProSource Technologies, LLC
